Summary

IT Support and Technical Support professional with hands-on experience in hardware troubleshooting, software support, and basic network connectivity. Experienced in supporting office users, maintaining system performance, and resolving technical issues efficiently. Background in customer support with the ability to manage multiple chat interactions while delivering accurate and timely solutions. Skilled in Google Workspace, system maintenance, and end-user support. Strong communication, problem-solving, and multitasking abilities.

Professional Experience

IT Support Intern (OJT)

- Pampanga II Electric Cooperative Inc.
02/2025 – 05/2025 | Guagua, Pampanga
- Provided IT support to office staff by diagnosing and resolving hardware, software, and peripheral issues
 - Performed system maintenance, updates, and workstation setup to ensure reliable daily operations
 - Assisted in basic network troubleshooting, including connectivity checks and device configuration
 - Maintained IT service records and documentation using Microsoft Office
 - Supported multiple users across the office by ensuring system functionality and minimizing downtime

Chat Support Representative

- Clear Concept Performance
08/2025 – 10/2025 | Angeles, Pampanga
- Delivered customer support through live chat by handling multiple conversations simultaneously
 - Resolved basic technical issues related to devices and software, reducing the need for escalation
 - Maintained response accuracy and timeliness in a high-volume support environment
 - Collaborated with team members to improve workflow efficiency and service quality
 - Applied strong communication and problem-solving skills to meet customer needs

Quality Assurance

- J&T Express Philippines
11/2025 – 11/2025 | San Fernando, Pampanga
- Monitored parcel flow, inventory status, and shipment updates within a logistics hub/warehouse environment
 - Used internal computer systems to track parcels, verify shipment details, and ensure accurate movement of packages
 - Identified and handled issues such as misrouted parcels, delivery delays, and return-to-sender cases
 - Assisted in coordinating with relevant teams to correct shipment errors and maintain proper parcel handling procedures
 - Performed basic data checking and validation to ensure accuracy of records in the system
 - Supported daily operational monitoring to help maintain smooth logistics workflow and timely processing of parcels

Projects

APPOKO – Web-Based Elderly Medication Monitoring System with GPS Tracking

Developed a web-based system for monitoring elderly health, medication intake, and daily activities with multi-user access for caregivers, doctors, administrators, and relatives, including system design documentation using standard diagrams. Implemented features such as real-time monitoring, GPS tracking, automated notifications, and basic data analysis, with centralized access to historical records for improved care coordination and decision-making.
